Objectives and Investment Policy

Objective

Banor Capital Ltd manages the investments of this fund.

We aim to provide you with growth in your capital over the long term.

Investment Policy

We mainly invest in shares of companies domiciled or having their main business in "Frontier markets". These markets are less developed and accessible than Emerging markets. They include markets such as Argentina, Kenya, Kuwait, Nigeria, Pakistan, Vietnam or other similar markets.

We may also invest in other Emerging markets as well as in bonds (loans) issued by issuers located in Frontier and Emerging markets.

Finally, we may invest in complex financial instruments with the aim of protecting the value of your portfolio or to increase the level of our investments. Such complex financial instruments may have a significant influence on the return of the Fund.

We take investment decisions on the basis of our quantitative and qualitative analysis based on regular assessments of investment flows in the entire market and/or in the individual company in which we invest.

This Fund is actively managed meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to any benchmark.

The reference index mentioned under "Performance Fee" in the below section "Charges" is only used for the calculation of the performance fee.

Risk and reward profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, under normal market conditions.

The following other risks can be significant to the Fund:

- The shares in which we invest can be easily sold under normal market conditions. Exceptional circumstances may lead to situations where these can only be sold at a loss for you.
- Investments may be particularly concentrated on few geographic areas or economic sectors.
- Investing in the above mentioned economies may present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.
- Counterparties to non-exchange traded financial contracts may fail to meet their payment obligations. We mitigate this risk by a thorough analysis of the financial condition of the counterparties with which we enter into such arrangements.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
