Objectives and Investment Policy

Objective

Banor Capital Ltd manages the investments of this Fund.

We aim to provide you with maximized returns compared to risk taken over the long term.

Investment Policy

We invest mainly in shares of companies that are subject to a merger & acquisition situation. Such shares may rise when the market considers that the merger/acquisition is beneficial to the target company. They may also decrease in value in the opposite case. In the latter situation, we may sell such shares.

Most of our investments are made in European companies.

We may also invest in short- or long-term bonds (loans) issued by corporations.

We may invest up to 10% of the assets of the Fund in bonds guaranteed by assets (ABS-Asset Backed Securities) or real estate properties (MBS-Mortgage Backed Securities) and up to 20% in Cocos (Contingent convertible capital instruments). Cocos are hybrid instruments issued by banks and having both the characteristics of bonds and of shares. All these assets may not exceed 20% of the assets of this Fund.

We may use financial contracts for the purpose of protecting your investment or for investing. Given their characteristics, these instruments may have a significant influence on the return of the Fund.

This Fund has no specific target market or geographic sector.

This Fund is actively managed meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to any benchmark.

Essential features of the fund:

You can buy and sell shares of this class every bank business day in Luxembourg.

This share class does not distribute any income to you.

In accordance with article 6 of EU regulation 2019/2088, the Sub-Fund does not promote environmental or social characteristics nor has as objective sustainable investment, as further disclosed in the Prospectus.

Risk and reward profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, under normal market conditions.

The following other risks can be significant to the Fund:

- The shares in which we invest can be easily sold under normal market conditions. Exceptional circumstances may lead to situations where these can only be sold at a loss for you.
- Investment positions may be relatively focused on one particular economic sector or country.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
