Objectives and Investment Policy

Objective

FIM Partners UK Ltd. manages the investments of this Fund.

We aim to provide you with growth in your capital over the long term.

Investment Policy

We mainly invest in bonds (loans) issued by companies and/or governments located or having significant business in Emerging and Frontier Markets (Global Emerging Markets). The latter are less developed than Emerging Markets, which are defined by the International Monetary Fund.

We invest more than 51% of the net assets of the Fund (the "Fund Assets") in Global Emerging Markets bonds. No more than 20% of the Fund Assets are invested in China or Russia. We invest more than 51% of the Fund Assets in 'hard' currencies (e.g. USD, EUR, etc., as defined in the Fund's Prospectus).

We may invest up to 30% of the Fund Assets in instruments issued by issuers from advanced economies. We may also invest in Structured Products (as defined in the Fund's Prospectus) up to 20% of the Fund Assets. 10% maximum of the latter may be invested in shares or in investment funds.

We may invest in complex financial instruments with the aim of protecting the value of your portfolio or to increase the level of our investments. Such complex financial instruments may have a significant influence on the return of the Fund. We take investment decisions on the basis of our qualitative and quantitative analysis. It is supported by high level conviction on markets, unconstrained allocation across asset classes and fundamental analysis.

This Fund is actively managed, meaning that the investment manager has, subject to the stated investment objectives and policy, discretion over its portfolio, with no reference or constraint to any benchmark.

Risk and reward profile

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, it does not necessarily reflect your future risk, nor reward. In particular, the financial instruments we use have specific characteristics that cannot be adequately reflected in the indicator above.

This share class is classified as above, since it has experienced moderate movements in its price. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, under normal market conditions.

The following other risks can be significant to the Fund:

- The bonds in which we invest can be easily sold under normal market conditions. Exceptional circumstances may lead to situations where these can only be sold at a loss for you.

- Investments may be particularly concentrated on few geographic areas or economic sectors.

- Investing in the above mentioned economies may present significant risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
